About Me

From the moment I produced "Hello World" in the console of my first application, I knew I was hooked into the world of software development. But software development has never been "just a job" for me, it's offered an engaging challenge to continually learn and improve my skills in creating high-quality software. What started with a simple "Hello World" has become a full-fledged passion that only gets more exciting as the years go by.

Below you will find projects I've completed that showcase my skills and general background in developing software

Experience

• eShop Web App ([GitHub repo](#))

Based on the Ecommerce web apps, this application was designed with React js and Spring boot to provide whole functionality of Ecommerce app with scalable architecture

• Sigma social network ([GitHub repo](#))

Based on social network applications, this application was designed to provide the best features of the other social network applications together, The UI of the application was developed with React js and Redux, and server side was developed with Spring boot, Spring Websocket, spring security and H2 in memory DB for storing data

• Resume Builder web application ([GitHub repo](#)), ([Demo](#))

Resume builder is a build tool used to solve the troubles and painful torments of building resume. The idea behind this app is to make building resume easier and faster where people can easily find, create and download their resume.

• Netflix clone web application ([GitHub repo](#)), ([Demo](#))

Based on Netflix application, this application was designed with React js and the ([api.themoviedb.com](#)) API for fetching the data, this app used to play videos from YouTube by video's name
